- + Developed web-site mock-ups for clients to ensure quality control and client satisfaction before project development phase.
- + Good team player and have excellent interaction skill to coordinate and work within a team.
- + Great ability to write clear, maintainable, well-documented, well-commented and efficient code for web development.
- + Solve problems for self as well another.
- + Handle stress and exhibit a positive attitude.
- + Proficient understanding of code versioning tools, such as 'Git / SVN'.

Experience

QED 42 [Current Employer]

May 2020 - Present

Drupal Front End Developer

Environment : HTML 5, CSS3, Bootstrap, Bootstrap 4, SCSS, Javascript, jQuery, Drupal - Twig, Content, Pre-processor, Region, blocks, views, theming

Learning points

Working with twig template, Regions, blocks also good knowledge about jQuery and SCSS.

In QED42, I have worked on 2 Drupal projects as a front-end developer.

1. Here PKT

- In this project, my responsibility is they are providing the design and we have to achieve the same design layout in drupal using twig, SCSS, jQuery, etc.

- I have also learned how to use the Drupal backend site like how to add content and how to edit views pages etc.

- I have also applied some basic pre-processors, gulp and grunt.

- Theming, design responsiveness, and browser compatibility.

- I have also learned how to work with the group and how to assign priority to the task.

- Worked closely with back-end developers.

2. QED42 Website

- For this project, I have contributed as front-end developer. I have worked on some of the pages and resolved UI-related issues as per the requirements.

- Design responsiveness, browser compatibility.

- QED42 website revamping, for that I am working on component based theming, setup basic folder structure, created SCSS structure and also update some regions and blocks related changes.
